city wild

As Rem Koolhaas wrote in his book ´Delirious of New York´, as all cities are equal.

They have the same flow, the same facilities and the same problems.

Every city needs a lung to function properly and Harbin has an interesting spine along the Majiagou river on which the city is structured.

The project site is nothing more than a black spot in the vegetal crack , therefore the project will seek to follow the river path creating a new space for leisure, a place for people to isolate with the aggressive city.

extending proyect area

For the management of the plot required consider necessary also reorder related plots for greatest consistency with the river path.

green point

We created a landmark in the city, we give an empty space to fill it with activity. It will be an ideal place to spend the weekend or to find a break in the day to day of the inhabitants of the city.
The rest of the project will revolve around this point

limit of river

We modify the boundaries with the river, creating a more natural and away from his vision of canal
with the idea of recovering the natural river feeling and give it back to the city.

wheeled traffic

We remove all kinds of traffic to generate free space of vehicles to be used by the real inhabitants of the city; the people.

suggestive image - fields outside Harbin

recovering River

The project aims to restore the sensation of river, where you can perform many activities relating to water in any season. Ice skating, pedalo, canoeing...

building A

The building was semi-recovered to create temporary exhibition spaces, that activate the place.
Service space for the river's activities

green point

the large square is the most important center of activity: concerts, shows, great live events ... be able to accommodate this space every weekend;
its real function is to create a space for isolation with the city

buildings B and C

They will be environmental footprints of buildings with uses of furniture for the green point.

buildings D

Use of the building is changed to create a public library in lovely vegetal .

Sports center

sports facilities will use tours around the area, having a nice place for running
